

# What **separates** us from the others.

**BaySeparator**

**W**hen you told us what you thought would make our separators better than the others, we listened. That's why today, you'll find the non-metallic BaySeparator not only more than capable of removing oils and gross pollutants from any size storm, including those that generate flows in excess of 100cfs, but also effective in customizable TSS removal of 80% or more.

With BaySaver Technologies' user friendly web-based sizing program, AutoCad Detail Generator, and on-staff engineers ready to field any question, specifying BaySeparator for your next project couldn't be easier and more efficient.

Now, with more than 1,200 stand-alone or pre-treatment installations worldwide, our BaySeparator, customized to your specific sizing combinations and fabricated to fit a variety of new or retrofitted applications, is among the leaders in the industry.

Find out more about the entire line of BaySaver products. Go to [baysaver.com](http://baysaver.com) to research, learn, specify, or just look around.
